### Product-Information

## PU Cleaner

### 1. Product Description

A special active cleaner for use on new floors immediately after installation and for the routine cleaning of floors factory-cured with a polyurethane finish as well as vinyl, linoleum or rubber floor coverings treated with PU Sealer. Excellent dirt-binding properties, even in the case of fatty deposits. Causes no damage to the floor surface, does not cause greying (development of grey filming).

### 2. Areas of Application

Resilient flooring with a polyurethane factory finish or treated with PU Sealer, Antislip or Anticolor.

### 3. Method of Application

#### Cleaning after installation:

Remove coarse dirt using a brush or vacuum cleaner. In case of stubborn dirt, dilute PU Cleaner in a ratio of 1:10 (1 litre to 10 litres of water), reducing the concentration accordingly for slight soiling. Distribute the cleaning solution over the floor and, after allowing to stand for a short time, treat the floor surface using a Monodisc appliance and red pad or scrubbing brush. Take up the dirt using a Spray extractor fitted with a hard floor adapter or absorbent wide-headed wiper mop and wipe over with clearwater to neutralise.

**Consumption:** approx. 1 l = 50- 100 m<sup>2</sup>

#### Daily Cleaning:

Dilute PU Cleaner in a ratio of 1:200 (50 ml to 10 litres of water) and wipe over the floor using this solution. The concentration can be reduced to 1:400 (25 ml to 10 litres of water) when using a fully automatic cleaning appliance.

**Consumption:** 1 l = 1000 m<sup>2</sup>

**Note:** Sensitive surfaces (such as wood, metal, furnishings) should not be sprayed with the cleaning solution

## PU Cleaner

## 5. Quality Inspection

Certified in Germany by the Forschungs- und Prüfinstitut für Facility Management GmbH, Metzingen (FIGR)

## 6. Unit Sizes

5 l canister

Art.-No. 0715000501
